

RELIABILITY ISN'T A LUXURY IT'S A NECESSITY

Single-shift and other operations requiring one battery per truck are wholly dependent on reliable battery performance. **Single Battery Operation™** programs from **EnerSys®** can minimize risk and provide the industry's lowest cost of ownership. **Period.**

SBO: Reliability perfected.

SUPERIOR BATTERIES

Not all batteries are created equal. Only Ironclad® batteries have been engineered and manufactured to keep productivity high and operating costs low. By providing extended run time and increased daily lift truck performance, Ironclad tubular batteries will get more work done, help you avoid battery changes and last longer. Those are benefits you'll see on your bottom line. Can your battery do that? Only if it's an Ironclad.

SMART CHARGERS

Not all chargers come with brains. EnForcer® HF chargers use an exclusive ionic charge profile to intelligently diagnose the battery throughout the charge cycle. The battery is charged to its full potential in a shorter time using less electricity. You achieve longer run time, longer battery life and lower utility bills, and all you have to do is plug it in. How smart is your charger? If it's EnForcer, we'd say it's near genius.

RELIABLE SERVICE

Not just any service plan will do, when you depend on one battery to keep product moving. Only EnerSys® offers hassle-free maintenance and reliable repair services anywhere in North America, 24 hours a day. Excellent service from certified technicians keeps your operation humming and ensures the reliability you and your business needs. Can your service do that? At EnerSys, excellence is standard.

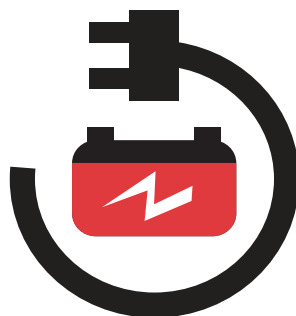

PROGRAM

Dependable, lean operations just got easier. SBO programs are uniquely designed to match the right **battery, charger and maintenance** program to ensure you get the maximum from your investment. We also offer comprehensive reporting to help you continuously identify opportunities to boost operational efficiencies.

PRODUCTS

No matter what size your company is, **EnerSys'** portfolio of Ironclad tubular batteries and the effective smart EnForcer chargers have you covered. Our tubular batteries offer up to **29% more run time capacity** than flat plate products which keeps your lift trucks running on long days.

ASSURANCE

We have your back: world-class service and warranty support is always **one call away**, any time of the day or night. And because our technicians are up to date on the most advanced technologies available, you receive a highly trained expert working to solve your problem on the spot. Now that's peace of mind you can count on.

SBO: LOWER COSTS & HIGHER PERFORMANCE

1

Achieve long run time

- Run hard and avoid costly battery changing with high run time Ironclad® batteries and EnForcer® HF chargers
- With superior square tube technology, Ironclad batteries deliver more hours of run time than any other battery
- EnForcer HF chargers return more power to your batteries in a shorter time

1

Reduce utility bills up to 15%

- Reduce costs everyday by replacing SCR and Ferroresonant chargers with EnForcer HF chargers
- Smart EnForcer HF chargers with higher switching speeds charge batteries faster and with less electricity draw

1

Increase battery life

- Reduce wear on your batteries using the Ionic charge profile in smart EnForcer HF chargers
- By intelligently diagnosing the battery during charge, batteries are returned to a higher specific gravity
- High specific gravity translates to more run time and less wear on the battery

1

Run hassle-free

- One call addresses batteries, chargers, hassle-free watering programs, repair and maintenance services
- Concentrate on your business and let EnerSys® keep you powered up with services that ensure peak performance from your batteries and chargers
- Rely on the industry's gold standard in warranty service that ensures you achieve your full return on investment

SMART SINGLE BATTERY OPERATIONS

Productive batteries paired with smart chargers and 24-hour, world-class service. Some call it a luxury... You know it's a necessity.

Valued partnership

For more than 100 years, thousands of companies have trusted their single battery operations to EnerSys®. Why? Simple: Customer satisfaction.

As the global leader in stored energy solutions for industrial applications, EnerSys products have been engineered for long life and reliability, and field proven in every type of lift truck operation. Although running your business may be very demanding, you can run efficiently and hassle-free.

Connect with us today to see how EnerSys SBO products are made to last longer, power reliably and optimize your operation.
